Brown-headed Cowbird	C	C	O	
Brewer's Blackbird	R	R	R	R
<b>Finches, Old World Sparrows</b>				
Evening Grosbeak	R		R	R
House Finch	C	C	C	C
Purple Finch	U	U	O	R
Red Crossbill	O	O	O	O
Pine Siskin	R		R	R
Lesser Goldfinch	U	U	U	U
American Goldfinch	C	C	C	U
House Sparrow	U	U	U	U
<b>The following species have been recorded at Jackson Bottom but are not expected with any regularity.</b>				
Acorn Woodpecker				Hudsonian Godwit
American Tree Sparrow				Lark Bunting
Barrow's Goldeneye				Leach's Storm Petrel
Bar-tailed Godwit				Mountain Chickadee
Black Scoter				Nashville Warbler
Black Tern				Northern Goshawk
Black-necked Stilt				Northern Pygmy-Owl
Blue-gray Gnatcatcher				Palm Warbler
Brown Pelican				Prairie Falcon
Calliope Hummingbird				Red Phalarope
Clark's Grebe				Ross's Goose
Common Loon				Sanderling
Common Redpoll				Short-eared Owl
Forster's Tern				Snowy Egret
Gray Jay				Snowy Owl
Gyr Falcon				Tricolored Blackbird

# The Birds of Jackson Bottom Wetlands Preserve

This 2018 checklist includes 215 species. Domestic, exotic and hybrid species are not included. Forty species have been recorded but are not expected with any regularity.

Some notable changes since the 2009 checklist include: the addition of nesting Osprey and Great Egrets; Lazuli Buntings, once occasional in spring, are now common spring and summer; American White Pelicans, once unexpected, are now rare to uncommon spring, summer and fall; Marsh Wrens, once common are now rare.

Bald eagles began nesting at the Preserve in 2000. A pair has nested here each year since, usually fledging one or two chicks each year. They have built and lost four nests on the Preserve, each one lasting 1 – 8 years before falling. Their fifth nest is just west of the Preserve.

Jackson Bottom is designated an Important Bird Area (IBA) because it provides critical winter resting and feeding habitat for thousands of migratory waterfowl such as Northern Pintail, Cackling Goose, Tundra Swan, Green-winged Teal and many more. It is one of three IBA's in the Tualatin River Watershed.

Over the course of a year one can observe a diversity of raptors, waterfowl, songbirds and shorebirds at the Preserve. Four miles of trails, open dawn to dusk, allow access to wetlands, uplands and riparian habitats. Some trails may be flooded between November and April. A restroom is available during daylight hours at the main parking lot and in the visitor center, open seven days a week (except holidays) from 10 am – 4 pm.

## Seasons

Sp – Spring      March – May  
 Su – Summer      June – August  
 Fa – Fall      September – November  
 Wi – Winter      December – February

## Seasonal Abundance Codes

C – Common, easily seen in season.  
 U – Uncommon, usually present through season but low numbers or harder to find.  
 R – Rare, present every year in season but not continuously or difficult to find.  
 O – Occasional, not present every year in season, but expected from time to time.

COMMON NAME	Sp	Su	Fa	Wi
<b>Geese, Swans, Ducks</b>
